

EMR POWER RANKINGS

by ovativegroup

Are you a marketer wondering how your planned quarterly or annual media investment stacks up? Do you have confidence in the channel mix needed to drive performance? Could you be missing any key media tactics to maximize enterprise marketing return? Ovative's EMR Power Rankings are here to help.

Ovative's EMR Power Rankings highlight the paid media channels and tactics driving the highest Enterprise Marketing Return (EMR) and the difference in performance compared to legacy Return on Ad Spend (ROAS). Use these rankings to ensure you are investing in the right channels and not missing any key media opportunities. EMR Power Rankings are calculated by anonymizing 2021 performance data and EMR scores across our retail client base. Using this data, we are able to make informed predictions about which tactics will perform best in 2022.

Each of the key EMR components (Online Sales, Offline Sales, and Future Customer Value) are scored on a scale of 0-100. Adjusting for scale and diminishing returns, a weighted average is calculated to determine the EMR Power Score. The higher the score, the stronger that channel or tactic is in driving EMR or a specific component of EMR.

Read more about our EMR Retail Power Rankings [here](#).

Legacy Comparison

EMR Power Score Breakdown (0-100 Score)

Example	Paid Media Tactic	EMR Power Score	Legacy ROAS Score	Delta (EMR - Legacy ROAS)	Online Sales (40% weight)	Offline Sales (40% weight)	Future Customer Value (20% weight)
